#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (US patent 2,117,174).

The patent to Jones discloses a scalloped edge as is claimed (fig.1). Note planar rubber strip (13) which has a beveled scalloped edge (16). The intended use of the edge of "for a dustpan" or that it is "adapted for attachment to a front end of a blade of the dustpan" does not define any structure not shown or disclosed by Jones. The strip of Jones could be used in any manner so desired, nothing would prevent such.

Art Unit: 1744

Claims 9, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Calame (US patent 2,252,879).

The patent to Calame discloses a scalloped edge as is claimed (fig.5). Note planar metal strip (124) which has edge (126) with beveled scallops (261) thereon. The intended use of the edge of "for a dustpan" or that it is "adapted for attachment to a front end of a blade of the dustpan" does not define any structure not shown or disclosed by Calame. The strip of Calame could be used in any manner so desired, nothing would prevent such.

Claims 9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Meyerhoefer (US patent 3,118,165).

The patent to Meyerhoefer discloses a scalloped edge as is claimed (figs.9,11). Note planar rubber strip (30) which has an edge with scallops (33) thereon. The intended use of the edge of "for a dustpan" or that it is "adapted for attachment to a front end of a blade of the dustpan" does not define any structure not shown or disclosed by Meyerhoefer. The strip of Meyerhoefer could be used in any manner so desired, nothing would prevent such.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Meyerhoefer (US patent 3,118,165) in view of Gringer (US patent 5,809,605).

The patent to Meyerhoefer discloses all of the above recited subject matter with the exception of the blade being of plastic material.

The patent to Ginger discloses a squeegee assembly wherein the blade (6) can be made of plastics material.

It would have been obvious to one of skill in the art to make the blade of Meyerhoefer of plastic material instead of rubber, as clearly suggested by Gringer, as an inexpensive substitute to the rubber material. Further, the choice of materials for the squeegee blade appears an obvious design choice based more of the choice of the manufacturer and the availability of materials than on any inventive concept. Plastics and rubbers are well known, art recognized substitutes for one another.

# Allowable Subject Matter

Claims 1-8 are allowed.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary K Graham whose telephone number is 571-272-1274. The examiner can normally be reached on Tuesday to Friday (6:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Warden can be reached on 571-272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
